I am an over the road truck driver, and I purchased the XM Satellite radio system. I rely on it for up to the minute traffic and weather for cities that I am traveling to. I couldn't imagine my life with out it. I used to spend alot of time searching for a radio station to listen to and just as soon as you would find one the signal would weaken and the process would have to start all over again. I find that this is so much safer do to the radio never dropping it's signal. I would also like to remind you that I pay for this service, and do not want the National Association of Broadcasters to decide what I can hear. Please reject the National Association of Broadcasters petition 04-160, and let me continue to listen to XM..
